As per claim 22, the prior art record fails to particularly disclose the combination of the following limitations:

"...determining whether the particular page is in the cache without blocking access by other threads to pages in the cache...

... if the particular page is in the cache, attempting to obtain the latch for purpose of reading the particular page; and allowing the first thread to read the particular page unless a second thread has latched the particular page on an exclusive basis..."

As per claim 29, the primary reason for allowance of claim 1 in the present invention is the combination with the inclusion that there are the limitation of:

"...allowing the first thread to read the particular page unless another thread has latched the particular page on an exclusive basis...

...a list of reusable pages representing pages in the cache that are available of reuse, wherein the list of reusable pages in structured as a double ended queue and

wherein the cache manager identifies a page in the cache that can be reused and adds the identified page to one end of the double ended queue.”

All claims that are depending directly or indirectly to claims 1, 22, and 29 above are also allowable for at least the same reason noted above.
